FERTIGATE-Y

FERTILISER

FORMULATED FOR YOUNG PLANTS REQUIRING STATURE AND HARDINESS.

grochem

Contains: Nitrogen 12.8% Phosphorus 17.0%, Potassium 10.2%, Sulphur 4.2%, Iron 0.08%, Manganese 0.04%, Zinc 0.03%, Copper 0.01%, Boron 0.03%, Molybdenum 0.004% as water soluble powders. Copper, Iron, Manganese and Zinc are chelated to ensure rapid plant availability.

ELEMENTAL (NZ/AU): N 13% P 17% K 11%
OXIDE (EU): N 13% P 39% K 13%

PLEASE READ LABEL AND SAFETY DATA SHEET COMPLETELY BEFORE USE THIS PRODUCT MUST NOT BE USED FOR ANY PURPOSE OR ANY MANNER CONTRARY TO THIS LABEL.

Wash exposed skin thoroughly after handling. Wear protective gloves and eye equipment.

DO NOT handle until all safety precautions have been read and understood.

FIRST AID: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.

IF SWALLOWED: Rinse mouth, give plenty of water. DO NOT induce vomiting.

IF ON SKIN: Wash with plenty of soap and water.

Call a POISON CENTRE or Doctor if effects persist or you feel unwell.

24-hour Emergency Telephone Number – For advice contact the National Poisons Centre – 0800 POISON (0800 764 766) – or doctor, immediately. Have product container or label at hand.

For specialist advice in an emergency only, call 0800CHEMCALL (24h 0800 2436225). For transport emergency dial 111.

CONDITIONS OF SALE: As no control can be exercised over the manner in which or the conditions under which this product is used, all conditions and warranties expressed or implied, other than those required by statute are excluded. No responsibility will be accepted for any damage or injury whatsoever arising from the storage, handling, application or use of this product.

Approved Pursuant to the HSN0 Act 1996, under the Fertilisers (Subsidiary hazard) group standard. No HSR002571. See www.epa.govt.nz for approval conditions.

DIRECTIONS FOR USE: Fertigate Y is formulated as a balanced feed for use in establishing young plants. The ratio is suitable for situations where plant stature and hardiness is required with some extension growth. Fertigate Y is generally suitable for use where high phosphorous levels are required coupled with adequate levels of nitrogen and potassium.

APPLICATION: To dissolve, add fertiliser to water at a maximum concentration of 1kg per 4L of water, and stir until dissolved. The use of hot water speeds up the process.

FERTIGATION: Apply Fertigate Y at a rate of 0.5 – 2.0 kg per 1000 litres of water depending on plant size and growth stages. Fertigate Y is suitable for use through all types of fertigation systems including spray systems.

FEATURES: Fully soluble. Chelated trace elements. No precipitation or nozzle blocking. Buffered. Safe on foliage.

SAFETY DATA SHEET: A Safety Data Sheet should be available at all work places where Fertigate Y is stored or used (available from Grochem or www.grochem.com).

STORAGE AND TRANSPORT: Store locked up in a cool dry place. Do not carry on a passenger service vehicle.

DISPOSAL: This product should be disposed of by use in the manner described on the label, or by depositing it in an approved landfill. Dispose of empty packaging by burying in an appropriate landfill
